TECH SKILLS

- **Languages** - Javascript, Nodejs
- **Frameworks & Tools** - Angularjs, Angular 2+, Ionic, Angular Material, Kendo UI, React.
- **Database** - MongoDB, MySQL.
- **Version Control** - Git, Github, Gitlab, Bitbucket.
- **Cloud & Devops** - CI/CD, Jira, Nginx, Postman.
- **Methodologies** - Agile (Scrum & Kanban), RESTful API Design Principles

LANGUAGES KNOWN

- English
- Hindi

WHAT I BRING ON THE TABLE

I bring more than just a set of skills and experiences - I bring a strategic mindset that thrives on identifying opportunities, building strong client relationships, and driving business growth. This business acumen, paired with my analytical insight, adds a unique spark to every sales initiative and deal I pursue.

WORK EXPERIENCE

Senior Software Developer

Oasys cybernetics pvt ltd | April 2021 - currently | Remote

- Led full-stack development initiatives, overseeing all stages of the software development lifecycle (SDLC) from conceptualization to production, ensuring high-quality solutions aligned with business goals.
- Architected and optimized scalable systems, improving performance and reliability of high-availability web platforms and mission-critical internal applications.
- Mentored and guided junior developers, fostering an environment of continuous learning and knowledge sharing, while ensuring adherence to coding standards and best practices.
- Designed and deployed complex software solutions, driving business growth by delivering highly efficient and secure applications for diverse business needs.
- Implemented advanced testing frameworks, including automated regression and system-level testing, ensuring seamless functionality and improving overall software quality.
- Collaborated with cross-functional teams (designers, product managers, QA) to align software features with business objectives and customer requirements.
- Resolved critical production issues with root cause analysis and quick turnaround solutions, ensuring minimal downtime and optimal system performance.
- Proposed and implemented technical innovations to improve code quality, system reliability, and maintainability, leveraging best practices in modern software architecture.

Full Stack Developer

Full Time Freelancer | Nov 2020 - Apr 2021 | Remote

- Collaborated with cross-functional teams to design, build, and maintain secure, scalable internal applications.
- Provided end-to-end development support—from gathering requirements to post-release monitoring and bug fixing.
- Spearheaded system-level QA and regression testing initiatives to improve software reliability.
- Contributed to continuous improvement of existing systems by redesigning key components and modernizing legacy code.
- Developed reusable components and libraries for team-wide use, promoting maintainability and faster development cycles.
- Enhanced development workflow by introducing continuous integration and automated deployment pipelines.
- Diagnosed and resolved pre-production issues to ensure smooth releases and reduce post-deployment bugs.

Software Developer

75way Technologies Pvt Ltd | Jan 2018 - Nov 2020 | Panchkula, Haryana

- Collaborated on all stages of systems development lifecycle, from requirements gathering to production releases, delivered and maintained scalable system architecture to support high-availability Internet site with various internal applications
- Analyzed requirements and designed, developed and implemented software applications for multiple websites
- Designed, implemented and monitored web pages and sites for continuous improvement
- Performed regression and system-level testing to verify software quality and function prior to release
- Streamlined deployment process by developing continuous integration tools
- Tested websites and performed troubleshooting prior to deployment
- Wrote clean, clear and well-tested code for various projects

EDUCATION

Master of Computer Applications
Sahibzada Ajit Singh Institute of Information
Technology | Aug 2016 – Jun 2018

Bachelor of Computer Applications
L.N. Mishra College of Business Management | Aug
2013 – May 2016

Secondary School Certificate (SSCE)
Dr. Shaligram Misra College | Apr 2011 - Mar 2013

Higher School Certificate (SSCE)
High School Kalyanpur | Mar 2010 - Feb 2011

PROJECTS

Health Management Information System

Digitized government hospital operations, enabling cost reduction, improved efficiency, and enhanced accuracy in healthcare services.

- Upgraded the application from Angular 8 to Angular 18, ensuring compatibility with the latest features, improved performance, and long-term support.
- Implemented encryption for all API requests using Angular HTTP interceptors, enhancing data security and protecting sensitive information in transit.
- Spearheaded the development of core features, increasing system efficiency by 25%.
- Enabled real-time collaboration and data access across multiple departments.

Confirmed

Built an online meeting scheduling platform to reduce back-and-forth of meeting confirmations.

- Developed user-friendly UI components, enhancing overall customer satisfaction by 20%.
- Reduced meeting confirmation time by automating 80% of the scheduling process
- Integrated third-party calendar APIs (e.g., Google Calendar, Outlook) to support seamless event synchronization.

Fixturewire / THOR

Managed a multi-platform solution for cargo and freight tracking.

- Introduced process automation, reducing manual input by 40%
- Led the development and deployment, ensuring 99.9% uptime for mission-critical systems
- Designed RESTful APIs enabling secure real-time data exchange between mobile apps and central tracking servers.

CarServ - The Operating System for Auto Repair

Developed software for automotive repair shops.

- Contributed to the redesign of the platform, improving user experience by 20%.
- Implemented features that reduced repair order processing time by 30%.
- Worked closely with mechanics and shop owners to gather feedback and iterate on UI improvements.

Farms Healthy

Developed an e-commerce platform for organic farm products.

- Designed and developed both web and mobile applications, resulting in a 50% increase in customer engagement
- Implemented Node.js backend, reducing server response time by 20%.
- Integrated secure payment gateways and inventory management to streamline the checkout and order tracking process

DECLARATION

I, Nitish Bhardwaj hereby declare that the information contained herein is true and correct to the best of my knowledge and belief.
